This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

If this document is in public or private pre-General Availability status:

This documentation is in pre-General Availability status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to

this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

If this document is in private pre-General Availability status:

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your pre-General Availability trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described in this document may change and remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle PartnerNetwork Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided "as is" and "as available", for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos, where the term "Service" shall mean the SuiteProjects Pro Service.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Test Plan Template Available for Download

Download the Release Preview Test Plan Template to create a test plan for each of your business workflows. This Microsoft Excel worksheet includes a testing matrix, workflow worksheets, and examples. After you have downloaded the file, modify it to suit your testing needs.

Click the following link to download the template: [ReleasePreviewTestPlan_Template.xls](#).

Overview of Release Preview

The release preview account is a temporary and isolated test account that is running the new version of SuiteProjects Pro software. It is available for a short period before your production account is upgraded to a new SuiteProjects Pro release. You can use the release preview account to:

- Become familiar with the new features and other changes in the upcoming SuiteProjects Pro release.
- Verify that your existing business workflows function as expected before your production account is upgraded to the new SuiteProjects Pro release.

The goal is to provide a smooth and seamless transition to a new release. By following the guidelines in the release preview guide, you can avoid major problems or surprises when your production account is upgraded to the new SuiteProjects Pro release.

Your release preview account is separate from your SuiteProjects Pro production account. Use your release preview only for testing. Make sure you are working in your SuiteProjects Pro production account when you are performing your daily business activities.

Important: Review the following information:

- Changes made in your release preview account will not be reflected in your production account.
- Your release preview account is created automatically using a recent copy of your production account database.
- Your release preview account will be deleted shortly after your production account is upgraded to the new SuiteProjects Pro release.
- Your release preview account cannot be refreshed during the release preview period.
- Read the release preview version of SuiteProjects Pro release notes for information about enabling and using new features. To enable a new feature on your release preview account, contact SuiteProjects Pro Support. See the help topic [2024.2 Release Notes · October 12, 2024](#).

Preparing for Testing

Download the Release Preview Test Plan Template to create a test plan for each of your business workflows. This Microsoft Excel worksheet includes a testing matrix, workflow worksheets, and examples. After you have downloaded the file, modify it to suit your testing needs.

Click the following link to download the template: [ReleasePreviewTestPlan_Template.xls](#).

Refer to the following resources for more information about the upcoming release so that you have time to review new or changed functionality well before the release:

-  [Release Sneak Peek](#) — The Release Sneak Peek provides an overview of top features planned for the upcoming SuiteProjects Pro release. It is available 4 to 5 weeks before the release date.
- [2024.2 Release Notes · October 12, 2024](#) — The SuiteProjects Pro Release Notes list the new features and product enhancements introduced in the upcoming release and provide information about enabling and using new features. A release preview version of the release notes and online help is available with your release preview account.

To prepare for testing in your release preview account, review the following sections:

- [Accessing Your Release Preview Account](#) explains how to access your release preview account so that you can become familiar with the new features and test them with your business workflows.
- [Functionality Available for Testing](#) includes a list of features that cannot be tested in your release preview account .
- [How to Report Release Preview Issues](#) explains what to do if you encounter an issue.

Accessing Your Release Preview Account

Account administrators receive email notifications containing details about SuiteProjects Pro release preview and production upgrade, and announcing the date when your release preview account will be available for testing.

Note: Access to your release preview account ends on the date your production account is upgraded to the new release.

Your release preview account is separate from your SuiteProjects Pro production account. The release preview account is a temporary and isolated test account that is running the new version of SuiteProjects Pro software. Use your release preview account only for testing. Make sure you are working in your SuiteProjects Pro production account when you are performing your daily business activities.

Your release preview account cannot be refreshed with data from your production account during the preview period. Data and configuration changes made in your preview account cannot be transferred to your production or sandbox accounts.

Note: OpenAir is now SuiteProjects Pro. As of 5 a.m. Eastern Time (UTC-5) on January 25, 2025, for your sandbox account, and on February 15, 2025, for your production account, service URLs with the `netsuitesuiteprojectspro.com` domain name replace URLs with the `openair.com` domain name.

For your production account, the sign-in page URL now is <https://auth.netsuitesuiteprojectspro.com/login>. After signing in, you are redirected to an account URL with the `netsuitesuiteprojectspro.com` domain name. Any links or bookmarks to sign-in page or account URLs with the `openair.com` domain name redirect to the SuiteProjects Pro sign-in page, even if you have an active SuiteProjects Pro session in a different browser tab.

For more information about the change, see the help topic [Introducing SuiteProjects Pro \(Action Required\)](#).

To access the release preview account from the URL:

1. Go to <https://auth.preview.netsuitesuiteprojectspro.com/login>
2. Enter the same sign-in details as for your SuiteProjects Pro production account.

Note: If you require users to sign in to your release preview account using 2FA, enroll them again – see the help topic [Enroll or disenroll users to sign in using 2FA](#). User 2FA-related information is not copied from your production account to your release preview account.

The following functionality is not supported on release preview accounts:

- Forgot your password or ID?
- Reset your password or unlock your user account

Functionality Available for Testing

Only modules that you have purchased and enabled in your production account are available in your release preview account. Make sure you understand the limitations of the release preview account when you use it to test features with your business workflows.

Functionality Not Available for Testing in Release Preview Accounts

The following table lists features that are not available for testing in release preview accounts.

Note: Omission from the following table does not guarantee availability.

If you are interested in using some of this functionality in your release preview account, please open an Enhancement Request. This will help prioritize future efforts. See [How to Report Release Preview Issues](#).

Features	Notes
Integrations	<p>No integrations are supported. This includes the NetSuite integration, custom integrations leveraging SuiteProjects Pro API, SuiteProjects Pro Integration Manager (SuiteProjects Pro Connect) among other integrations.</p> <p>The only exception is the SuiteProjects Pro OData service (Business Intelligence Connector). When testing this feature on your release preview account, you should keep data volumes to a minimum to avoid performance issues impacting the release preview environment.</p>
Thin Clients	SuiteProjects Pro Mobile for iPhone or Android devices, SuiteProjects Pro OffLine, SuiteProjects Pro Exchange Integration Manager, SuiteProjects Pro Outlook Connector, SuiteProjects Pro Project Connector.
Scheduled Events	<p>Anything running at a 'specified time'. This includes Automatic Backup Service, auto-billing, scheduled reports, scheduled alerts, scheduled scripts, leave accrual runs, charge projections. This also includes daily foreign currency updates for multicurrency accounts.</p> <div data-bbox="488 1283 1377 1394" style="border: 1px solid #0070C0; padding: 5px;"> <p> Note: Jobs which allow a "manual" run can be run manually, such as charge projections and leave accrual, unless otherwise specified as not supported. The NetSuite integration is not supported.</p> </div>
Email	No emails are sent from release preview accounts for any activity.
SAML Single Sign-On	<p>SAML authentication is not supported.</p> <div data-bbox="488 1524 1377 1669" style="border: 1px solid #0070C0; padding: 5px;"> <p> Note: Users accessing your SuiteProjects Pro production account using single sign-on cannot access the release preview account unless an account administrator or a user with the relevant access and role permissions turns SAML authentication off and resets the password for these users in the release preview account.</p> </div>
Forgot your password or ID?	The Forgot your password or ID functionality is not supported on the sign-in page for your release preview account.
Reset your password or unlock your user account	The Reset your password or unlock your user account functionality is not supported on the sign-in page for your release preview account.

Features	Notes
Account Refresh and Retention	<p>Your release preview account cannot be refreshed with the your production account data during the preview period.</p> <p>The release preview account is available only during the preview period. Access to your release preview account ends on the date your production account is upgraded to the new release.</p> <p>Data and configuration changes made in your preview account cannot be transferred to your production account or sandbox account.</p>

How to Report Release Preview Issues

Report any issues you encounter during testing by calling SuiteProjects Pro Support or by submitting a case online.

Note: Your release preview account is not connected to the production instance of SuiteAnswers. To submit a case, access SuiteAnswers from your SuiteProjects Pro production account.

To submit a case:

1. In you SuiteProjects Pro production account, go to the User Menu and click **Support**.
2. Click **Explore SuiteAnswers**.
3. In SuiteAnswers, click **Contact Support Online**.
4. Provide detailed information about the issue. Indicate that you encountered the problem in your release preview account, and not on your production account.
5. Under Online Support, click **Create Support Case** and provide details of your issue.
A case is created in the NetSuite Support system under your release preview account and is flagged as a problem.

Suggested Test Plan

Download the Release Preview Test Plan Template to create a test plan for each of your business workflows. This Microsoft Excel worksheet includes a testing matrix, workflow worksheets, and examples. After you have downloaded the file, modify it to suit your testing needs.

Click the following link to download the template: [ReleasePreviewTestPlan_Template.xls](#).

The following sections provide a plan for testing your account thoroughly during the release preview period:

- [Test Your Business Workflows](#)
- [Test Critical Reports](#)

Test Your Business Workflows

To make the most of the release preview period, you should identify, document, and test the key business workflows in your production account. Testing your critical workflows and reports, and reporting any

issues you encounter is the most important aspect of release preview. Compile a list of the critical task paths your employees follow to get their jobs done and create a document for each process.

You should use a spreadsheet application and create a separate worksheet for each common daily task. Use this spreadsheet as your checklist during testing. Although this is not required, it may help you be more efficient and organized during future release preview testing.

Download the Release Preview Test Plan Template to create a test plan for each of your business workflows. This Microsoft Excel worksheet includes a testing matrix, workflow worksheets, and examples. After you have downloaded the file, modify it to suit your testing needs.

Click the following link to download the template: [ReleasePreviewTestPlan_Template.xls](#).

At minimum, each business workflow documented should contain the following components:

- **Business Workflow Name** – Provide a unique name.
- **Role** – Specify the role to use when testing the process.
- **Email** – Specify the email address to use for testing.
- **Steps** – Provide the detailed navigation required to accomplish the desired task.
- **Results** – List expected results.

Important: Whenever possible, try to incorporate users with different roles when testing your business workflows (Finance, Project Manager, Resource Manager, Consultant or End User, for example), rather than testing only as an account administrator. If it is impossible to procure those resources for testing, you can use the Proxy/Log-in as feature to test 'as them'. You may find critical defects that impact specific roles but do not impact account administrators.

Suggested Areas for Testing

Critical workflows depend on your specific business requirements. The following list is provided for reference only. Some of the following areas may not be applicable to your account and you may have critical workflows that are not included in this list.

- Timesheet entry
- Expense entry
- Approvals (approve time, expense, invoices, and other transactions set up for approvals on your account)
- Billing and invoicing (run billing for a project, create an invoice)
- Creating and updating bookings or staffings
- Viewing, creating and updating bookings or staffings on the chart, worksheet, or planner.
- Creating and updating project plans, tasks and task assignments
- Running charge and revenue projections manually. Make sure they are generated properly using a report – See [Test Critical Reports](#).
- User event scripts on any form (if you are using the SuiteProjects Pro user scripting platform).

Test Critical Reports

Important: The release preview environment is not designed for production level usage and data processing. You should modify any reports which typically run longer than 5-10 minutes before you run them on your release preview account. Use filters to look at a single day or otherwise limited data set.

The release preview is a copy of your production account as of a certain date, so the data in it may not be the same as in your production account. You should generate reports using date ranges that can be compared between both accounts. Ensure that the report does not encompass newly added or updated data on your production account that is not reflected on your release preview account. Release preview accounts cannot be refreshed or recreated during the release preview period.

You should use the following steps to test all reports, not only large reports.

To test critical reports:

1. Identify the reports you want to test.
2. For each report you want to test, do the following:
 - a. In your release preview account, modify the report to look at limited data set for a date period that has comparable data in both your release preview and production accounts.
 - Change the Date filters such that the report period is only 1 day or 1 week.
 - Specify a time period for which no data was recently added or updated on your production account. For example, pick a date 6 months ago.
 - b. Save a copy of the report, and run it. Download it as a CSV file and retain this CSV file on your computer.
 - c. In your production account, run the report with the same date range that you used in your release preview account.
 - d. Compare the results.
 - e. If you need to report an issue to SuiteProjects Pro Support, ensure that you keep copies of the saved report in both your release preview and production accounts.

Tip: To save some steps for future release preview testing, keep a copy of the modified report in your production account.
