

User Experience

OpenAir is now SuiteProjects Pro

Oracle NetSuite repositions SuiteProjects Pro (formerly OpenAir) as an advanced PSA solution that expands upon capabilities embedded in NetSuite ERP to meet more complex business needs with automation designed to optimize the entire project delivery lifecycle, and AI-powered capabilities on the horizon for future releases.

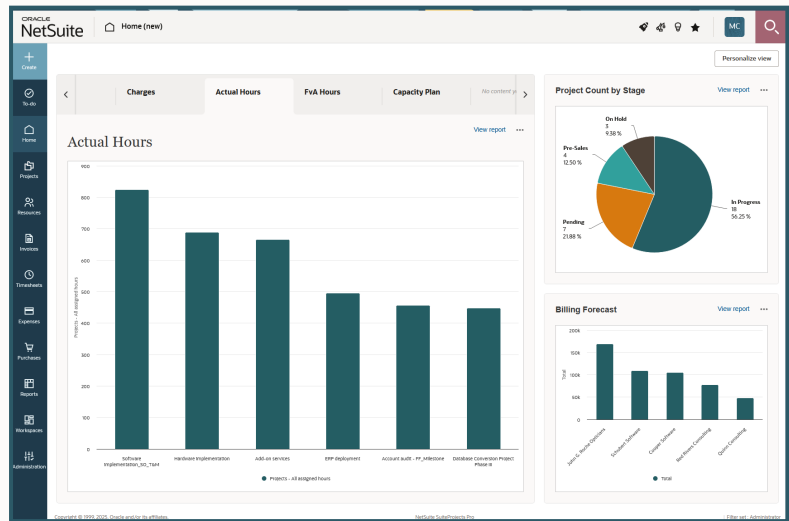

SuiteProjects Pro 2025.1 extends the Oracle Redwood user experience enhancements from previous releases with homepage charts, additional global search coverage, and to-do list in the mobile app. The 2025.1 release also launches a collaboration tool to help project contributors work better together, and closer integration with Oracle Analytics Cloud.

Next-generation homepage

Add charts to your homepage and get even more insights in one place.

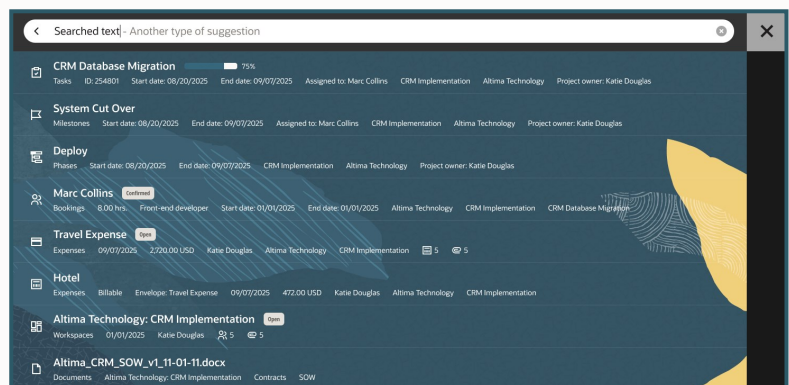

- Pie, donut, vertical bar, line or area charts are available in SuiteProjects Pro 2025.1.
- Use the first column in your report, or the date (dynamic time period) as category (x-axis).
- Additional chart types and support for multiple series will be available in future releases.

To enable the next-generation homepage, contact SuiteProjects Pro Support.

Global search

Find and access phases, tasks, milestones, bookings, expense reports, receipts, workspaces, and workspace documents using the Global Search feature introduced in SuiteProjects Pro 2024.2.

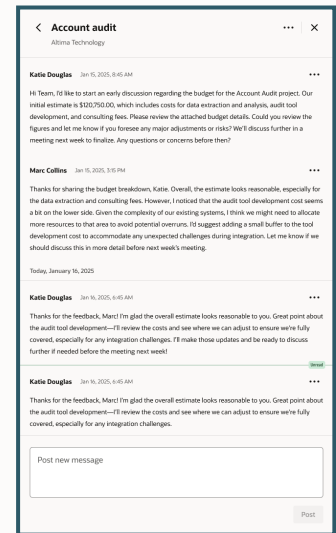

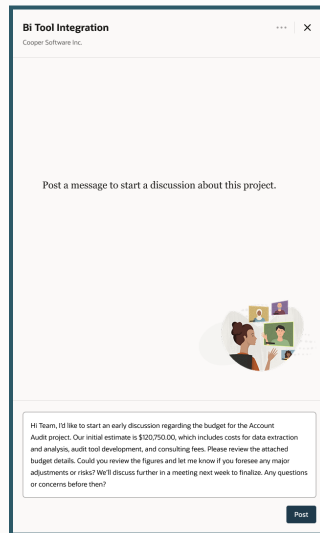

Projects

Project discussions

Work together for project success, staying in the loop with discussions and decisions.

- Start and take part in conversations about project delivery.
- Organize all messages about a specific project in one project discussion.
- Keep project discussions stored securely within SuiteProjects Pro.
- Access project discussions, read and post messages from any page in SuiteProjects Pro.

Reports

Report analytics

Access your SuiteProjects Pro data from Oracle Analytics Cloud (OAC).

- Publish your data to the SuiteProjects Pro BI Connector.
- Access your published reports through the OAC OData connection.

The **BI Connector** feature, is a licensed add-on. To enable the BI Connector feature, contact your SuiteProjects account manager.

Reports

Mobile

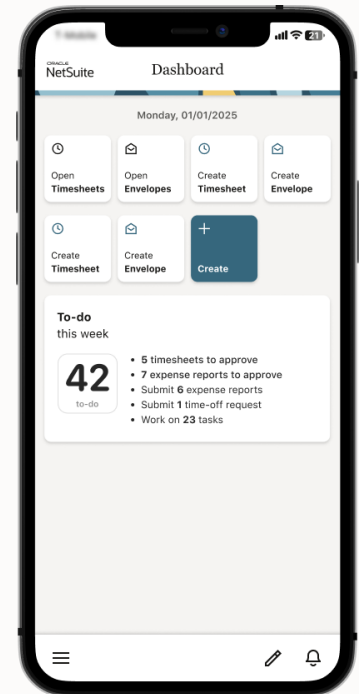

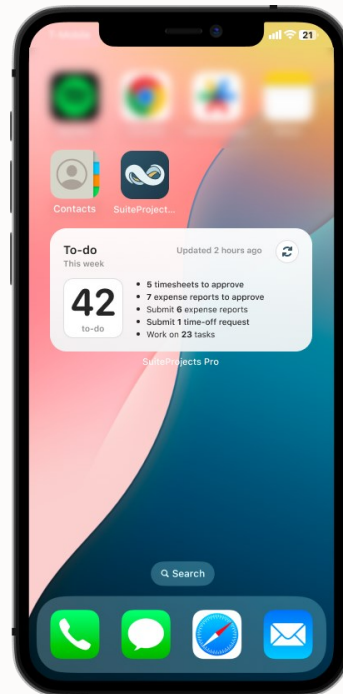

SuiteProjects Pro Mobile 5.3

To-do list

Get an up-to-date reminder of what you need to do both from the app dashboard and from the home screen of your mobile device.

The dashboard and home screen widgets show the same to-do list as in your SuiteProjects Pro account.

View a summary of timesheets or expense reports you need to submit for approval or approve on the To-do screen.

SuiteProjects Pro Mobile 5.3 will be released in the second quarter of 2025. Users will be informed of the new release through the App store (iOS) and Google Play store (Android).
